

NEWS MESSAGE 2010/2

To: All members & Delegates
Cc: Executive Board Members

- **Congress Meeting 2010**
The minutes of the meeting and the presentations shown during this meeting are now available on the website for consultation.
- **Executive Board**
The minutes of the board meeting of May 18th are also available on the website.
- **FCL-CRD**
The final consolidated comments filed by the EGU are published on our website. On the distributed draft of comments, we received only a few reactions. (The BGA, BGF, DAeC, FFVV and KNVvL posted some remarks, additional comments or requested some fine tuning / explanation of the text. A few other members replied with thanks for the effort and giving us 'green light').
- **Enquiry/Study 'Implementation of Part M'**
The first results of these study were presented by Howard, our TO Maintenance & Airworthiness, during the congress meeting in February. Some late received replies were added and after evaluation during the board meeting in May, the whole study was fine tuned and ready for publication. This report is now also available on our website. As we know that EASA is interested in our study, a meeting with M. Yves Morier is planned for the coming days.
- **Membership**
The Soaring Society of South Africa has joined the EGU as an associated member! Welcome!! Our organisation counts now 23 full members and 4 associated members.

In the mean time, enjoy the soaring season and keep it safe!

Best regards,

Patrick PAUWELS
President
